

# POS and QuickBooks Integration

Manually collecting POS or QuickBooks™ data can be a laborious task. Because of the effort involved, organizations are forced to use paper-based mechanisms and are often not able to collect valuable data on product and category sales.

The FranConnect adapter allows franchise organizations to directly collect sales data from the franchisees POS system or QuickBooks application. Collect sales receipt or invoice data without any manual effort. Set-up hourly, daily, weekly, monthly polling parameters. Works with any standard Windows based POS system. Collect customer information from QuickBooks.

## FEATURES:

- Integrate with franchisee's POS or QuickBooks Application
- Automatically collect daily sales data
- Works with any Windows based system
- Eliminate paper forms and manual data collection
