

This guide will help you to perform the People clean-up actions demonstrated in this Springboard session.

Examples of multi-unit employees: services industry, one massage tech/aesthetician works several locations, regional floater.

Anyone NOT an owner who needs access to multiple locations' information.

Over the next few pages, we'll take you screen by screen through this process.

Meet Aaron Dixon. He has four People records, two users, two MUIDs (only one of which is associated with a user), and 10 locations. He's about as messed up as a record gets. So how do we straighten him out?

1. Choose a record to be the main ID.

a. If there's a user record already for one, use that one.

b. If there's a MUID record, use that one.

In this case we have two records with users attached – a MUID record for Saket123, and a single-unit owner for 9117. Let's pick the one that has BOTH a user and a MUID to be our main record.

- 1. Associate all appropriate records with the main user record. This is where the second list comes in handy, to easily pull the location records without having to jump between screens.
- Disassociate the others from the units. Do this by removing the second owner record from the location. TIP: Pin "owners" to make it easy to delete the records. TIP: Set "View Per Page" to 100 and save view for a nice medium between too many pages and slow loading time.

We're sorting by first name, then last name, but you may want to run a last name/first name as your final pass – see "Joe" vs "Toe" Decart.

If this is the case	Do this
ls there a user record?	If you're using Franchise Users, consolidate to the owner that has the franchise user record attached.
More than one user record?	Pick one to be the master, and be sure to notify the location owner of their valid credentials. The other user will be removed when you delete the owner record from its last attached location.
Does one or more records have an MUID attached?	Pick the user with the most locations already attached, to save work!
Multiple owners with same name?	Consider altering the last names, e.g. John Smith1, John Smith2

The main consideration for picking the "main" record is the User record, which the owner or employee may be currently using. We'll try first to consolidate to that record. If you don't have franchisee users, this part is easily skipped.

Next most valuable is to choose the owner record with the most locations already attached. Apart from the amount of work to combine records, there's no downstream consequence to choosing one record over another.

		Pranconnec	t Administrat
🦥 Users			
11	their login credentials and export users' information.		
 Corporate Users Manage corporate users and their login credentials. 	 Brand Users Manage Brand Users1 and their login credentials. 	Store Group User Manage Store Group User and their login credentials.	
 Regional Users Manage regional users and their login credentials. 	 Franchise Users Manage franchise users and their login credentials. 	 Suppliers Manage suppliers' information along with the products they supply. 	
Import Users Import users using CSV/TXT file.	 Export Export users' information to XML/CSV/Excel. 		

To make our comparison easier, it makes sense to run a couple of reports so we have lists to refer to, rather than jumping from screen to screen in FranConnect.

If you have franchise users, run an export of them so that you can easily match owner records to their user records.

Go to the Admin gear, and in the Users section, choose Export.

All v Type and press enter Q	2 🏟 🕞 FranConnect Administrator
Admin > Users > Export	
PLEASE ENTER THE SEARCH PARAMETERS	Note : Your export limit is 5000 records. To export all records, please contact your system administrator:

Next, make a report on owners and their locations. This gives us an easy reference when associating owners with locations in the People screen.

In **Info Manager > Reports > Custom Reports**, make a new report with a name you'll remember.

Define report filters as anything you like; a good default is Franchise ID.

Define fields to display as shown in the illustration.

Choose Next, then export the report to an Excel sheet.

Just as in our User Records, it will be easiest to match our owner report to the People page if it is sorted by First Name, then Last Name.

Pro Tip: If you'd like to see more than 20 records on a page, set the number to display at the bottom right of the People Page, and click Save View.

Be aware that if you set a high number of records to display, the display will take longer to load...you'll need to strike a balance between how much you'd like to see and how long you're willing to wait for the page to load.

Arrange your three reports where they're easy to see. Identify the people records who need to be consolidated, and choose the record that will be the new combined record. In this case, we'll choose the one that has both a user and an MUID.

AS12	Select
C Washington DC - White House	Select
↔ FLX-FL Street	Select
	COUNT

Choose to associate units with the new single people record. You can type the unti names and click the magnifying glass icon to bring you right to the location to associate.

Keep typing unit IDs and selecting them until you've got your list to associate with your "new" record. When they're complete, click the **Save** button at the bottom right of the screen.

Now that the locations are associated with the new single record, it's time to remove the duplicate records.

For each of the "false" owner records, click on the location associated with that person to remove the false record from the Owners tab.

Go to the Owners tab in the location to remove the false owner. When you arrive in the Owners tab, you'll see both the new single record owner and the old duplicate. You can tell them apart because the new single owner will be listed as having other locations.

Continue through the locations of the duplicate records until only one remains.

Pro Tip: Pin the Owners tab to the top of the location record to save navigation to the owner record.
